## Skills

**Libraries & Frameworks** : React, Angular, Node.js, Express, Socket.io, Tailwind CSS, Framer Motion, GSAP, Bootstrap

**Programming Languages** : JavaScript, TypeScript, HTML, CSS, C++, Java, SQL

**Tools/Platforms** : GitHub, Vercel, Figma, Netlify, Postman, WordPress, MongoDB

## Relevant Experience

**Junior Frontend Developer** • *Trellissoft, Goa*  
August 2023 – February 2025

- Helped build key LMS modules like Assessments, User Management, and Licensing using Angular 16, always focusing on responsiveness and real-world usability.
- Worked on features like filtering, sorting, pagination, infinite scrolls, and lazy loading—small details that made a big difference when handling large amounts of data.
- Designed a dynamic weightage tracking system for assessments, making the scoring process more accurate and reliable.
- Spent time polishing UI components—tweaking layouts, improving accessibility (WCAG 2.1), and adding visual clarity that made the app easier and more enjoyable to use.
- Often jumped in to support teammates working with React and shared UI/UX ideas that helped us make better design choices as a team.
- Took part in code reviews and shared best practices that kept our frontend code clean, modular, and scalable for future updates.

**UI/UX Design Intern** • *Fluxatic Global, Goa*  
August – October, 2022

- Worked closely with a small team to design a mental health awareness app for a UI/UX competition.
- Created wireframes and high-fidelity mockups in Figma, focusing on calm, intuitive layouts that supported the app’s purpose.
- Took initiative in guiding design decisions and helped the team stay organized and presentation-ready—an experience that strengthened both my design thinking and leadership..

**Web Design Intern** • *Brushflicks*  
October 2021 – November 2021

- Helped design and set up a basic e-commerce website using WordPress and Hostinger.
- Applied themes and made layout adjustments with guidance.
- Assisted with content placement and visual styling.
- Gained hands-on experience in WordPress setup and design tools.

## Selected Projects

**Portfolio - kalpateli07** | **React • Vite • GSAP • Framer Motion**

- Developed a personal website that merges frontend development with UI/UX storytelling.
- Integrated interactive features, including a paper-plane scroll animation, glowing cursor effects, and animated project cards for a dynamic user experience.
- Designed to create a playful yet professional browsing experience, ensuring intuitive navigation.
- The project highlights my ability to combine design thinking with technical skills, reflecting both my creative vision and proficiency in web development.

**Nexvent - Event Discovery Platform** | **React • Tailwind CSS • Figma**

- Developed a landing page for an event discovery platform that suggests global online and offline events (excluding personal events).
- Focused on delivering an intuitive UI/UX, with features like interest-based event recommendations.
- Planned support for location-aware filtering in future updates.
- Designed additional pages in Figma, ready for implementation to expand platform functionality.

**Remote Delivery App** | **MERN Stack**

- Developed the frontend for a remote delivery service app as part of my final year project.
- Worked on key features like handling KYC forms and improving user and order flow.
- Helped teammates with various tasks and collaborated to ensure the app was both functional and user-friendly.

**Real-Time Chat App** | **MERN Stack • Socket.io**

- Built a real-time chat application by following a MERN + Socket.io tutorial.
- Gained hands-on experience with real-time messaging, including user authentication, private chat rooms, and typing indicators.
- Integrated WebSocket for seamless, real-time communication between users.

## Education

**Agnel Institute of Technology and Design**  
2019 - 2023  
BE Computer Engineering ~ 8.96/10

## Certificates

**The joy of computing using Python**  
• Completed NPTEL course with 82%  
**Complete Full Stack Website Developer Course**  
• Udemy (March 2025)
